EDUCATION

September
2020-
May 2024

Bachelor, Solent University, Software engineering

- Developed strong problem-solving and critical thinking skills through collaborative team projects.
- Gained proficiency in JavaScript, Java, Object-Oriented Programming, full-stack development, and Python.
- Hands-on experience with backend technologies such as SQLite, PostgreSQL, MongoDB, and Firebase.

September
2019 -
July 2020

Foundation Year, Solent University— *Computing*

- Completed foundation year in computing, acquiring essential skills in computer science, including proficiency in programming languages such as C and Python.

PROFESSIONAL EXPERIENCE

March 2023
- March 2024

Omidex , Finland-Remote— *Full Stack Developer*

- Built dynamic user interfaces using React.js.
- Collaborated with a team to develop web applications while learning and applying DevOps methodologies.
- Gained significant knowledge in collaboration and teamwork.

**SKILLS &
ABILITIES**

- Programming Languages: Java, C, JavaScript, React.js, NextJS, TypeScript, Node.js, Python
- Technologies: Azure, Docker, SQLite, PostgreSQL, MongoDB, Firebase, GitHub, Figma
- Development Practices: Agile, Critical Thinking, Problem-Solving, DevOps, Adaptability
- Other Skills: Test-Driven Development (TDD), Behaviour-Driven Development (BDD), CI/CD

**TRAINING AND
CERTIFICATION**

Full Stack development, CodeYourFuture, London
June 2022 - September 2023

Completed a full-stack development course at Code Future, focusing on Java, JavaScript, React.js, and Git/GitHub for source control. Developed collaborative skills through team projects, where we built applications using modern frameworks. This experience enhanced my proficiency in both front-end and back-end development.
